

# MiS MDR is available!

Discover MiS

## EFFECTIVE TREATMENT OF PERIPHERAL NEUROPATHIES.

MiS provides a **nerve structure repair** effect by **restoring the myelin sheath** and demonstrates efficacy in **alleviating pain sensitivity**, as highlighted by Micheli et al in the article *'Effect of NIR laser therapy by MiS source against neuropathic pain in rats: in vivo and ex vivo analysis'* - Nature, Scientific Reports, 9:9297, 2019.

**Optics:** MiS is equipped with the **Ø 5 cm collimated optical terminal**, allowing treatments from **direct contact up to 30 cm** distance in total safety.

**Expanded application modalities:** all programs can be run in **Scan, Point-by-Point** and **Fixed Point** mode (thanks to the use of the dedicated arm).

**Therapeutic dosage control (J/cm<sup>2</sup>):** depending on the application mode selected and the type of optical terminal connected, the **emission parameters are automatically adapted**.

**Dose/energy constraint:** this new feature **keeps fixed the clinically validated energy dose** or the **total energy** to deliver by varying the protocol parameters.

### ► New display

The new, even more sensitive display, allows precise brightness adjustments ensuring the best visibility in different conditions of use.

### ► New SW and new media library

The software is completely renewed, is available in 32 languages and provides the user with +400 new images and videos of specific treatments according to the chosen protocol, application mode and optical terminal.

### ► New Ø 5 cm optical terminal

Thanks to its spherical shape, the new optic allows for a pleasant massaging action when used in contact with the skin.

### ► Interlock

In accordance with the International Standard EN 60601-2-22 and to ensure increased safety, it is mandatory to connect the Interlock connector (included) to the device to deliver the therapy.

# Choose **EU MDR** devices!

European Union Medical Device Regulation (EU MDR) certified medical devices ensure **quality, safety** and **effectiveness** of the systems and treatments offered to patients.

Here's why investing in **ASA EU MDR medical devices** is the best choice.

## **PATIENT SAFETY AND PROTECTION**

EU MDR ensures that only tested and safe devices are on the market: with more than **30,000 devices** worldwide and **over 200 publications**, **ASA** stands for **efficacy and safety**. ASA systems are scientifically and clinically validated through extensive **research** work at **ASAcampus**.

## **AMONG THE TOP OF THE CLASS**

ASA **Quality System** is certified by **TÜV SÜD** Product Service GmbH. ASA received **EU MDR** certification in **April 2023**. ASA EU MDR systems undergo **rigorous compliance checks and audits**, thus ensuring durable, reliable and effective Therapeutic Solutions.

## **RIGOROUS CLINICAL EVALUATION**

To demonstrate efficacy and safety, ASA EU MDR devices undergo extensive evaluations based on **robust clinical data**. EU MDR requires maximum **transparency from the manufacturer to the patient**: ASA has long adopted **regular monitoring** of its devices worldwide.

◀ Did you know that some experiments conducted by ASAcampus were performed on the International Space Station?
